RESEARCH INTERESTS

Systems Neuroscience, Neuroethology, Brain Machine Interfaces, Reinforcement Learning, Tool development, Motor Sequencing & Learning, Neuroprosthetics, Electrophysiology, Neurophotonics.

EDUCATION

Boston University Graduate Medical School, Boston, MA

Ph.D., Neuroscience, *July 2017*

- Advisor: Timothy Gardner, Ph.D

Boston University, Boston, MA

B.S., Biochemistry & Molecular Biology *With Distinction*, May 2012

RESEARCH EXPERIENCE

Visiting Postdoctoral Scholar October 2017 to Present

Carmena Lab, U.C. Berkeley Department of Electrical Engineering & Computer Science

Research Summary: Large-scale, multi-site, multi-electrode recordings and multi-photon calcium imaging recordings in awake behaving rodents studying the neural circuits of neuroprosthetic skill learning.

Graduate Research Assistant May 2013 to July 2017

Graduate Program in Neuroscience, *Neurophotonics Graduate Fellow*

Research Summary: Designed and implemented of tools for Electrophysiology and Calcium imaging in awake behaving Zebra Finches to study motor learning and the stability of motor sequencing. The key finding was that the flexible participation of excitatory projection neurons (stabilized by mesoscopic-level inhibition), forms the mechanistic basis of memory maintenance and and motor stability in the songbird.

BI644/NE644 - Neuroscience Design Lab 2013–2016

Mentorship

Daniel Leman 2014–2017
Undergraduate Researcher; *Developed surgical/optical methods to longitudinally record cells in HVC. Received UROP award every semester from 2015-2017. Authorship on two published works: [4 & 5]*

Michelle Crough 2015–2017
Undergraduate Researcher; *Pioneered cell-type specific imaging in the songbird HVC*

Miko Dimov 2015–2016
Undergraduate Researcher; *Adapted optical recording rigs to study motor systems in canaries*

Carlos Gomez 2015–2016
Biomedical Engineering Senior design project; *Designed proof-of-concept wireless miniature microscopes. Contributed to publication [4],*

Ale Eguren 2015–2016
Biomedical Engineering Senior design project; *Designed proof-of-concept multi-wavelength capable miniature microscopes. Contributed to publication [4]*

Christe Ye 2016–2017
Research for credit; *Explored the effects of sleep on the stability of vocal motor production*

Service

CELEST Electronics & Experimental Design Course 2013–2015
Course Overview: Through NSF initiative CELEST: (Center of Excellence for Learning in Education, Science and Technology). Taught students from traditionally underrepresented backgrounds in science to program in C, and design simple circuits.

Graduate Resident Assistant 2011–2017
Overview: Support diverse student populations in living/learning communities on Boston University's campus.

Ad Hoc Referee: *PLoS ONE* 2016–present
